

NOTES ON THE LOOKUP TABLES:

The LOC\_VALD folder contains 36 lookup tables. The original data was created using Microsoft Access. Most of these tables are simply representations of picklists that were used in an Access form to maintain data integrity. Because of this, most lookup tables will not need to be accessed because the full description is already included in the data. But, a few of the tables do include additional information not in the data. These are the CHEM, LNRC, LNRC00, LNRC02, LNRC03, LNRC04, LNRC06 and LICENSE tables.
